

Geriatric Case Management

Sunset Home Services can monitor your frail and elderly patients who are considered at-risk or have concerned family members, but live independently.

Our Geriatric Case Management can *save you time and money* by reducing unnecessary hospitalizations & ER visits and eliminating frequent phone calls to your office. You can then shift your valuable resources to those patients who are medically compromised.

We can provide quick, reliable communication with your office, and the family, while increasing self management and improving compliance with the patient.

Sunset Home Services Geriatric Case Management provides:

- RN case management including initial assessment and coordination of care
- Specific screening tools including Mini-cog, ADLs, IADLs, Geriatric Depression Scale, Hearing Loss Screener, Abnormal Involuntary Movement Scale, Pain Scales, AUA symptom Index for enlarged prostate
- Reoccurring telephone contacts—to provide ongoing support & assess needs on a regular basis
- Home visits—ongoing monitoring of clients with stable but chronic health problems thus preventing costly crises and unnecessary hospitalizations
- Patient/family care education, counseling and support
- Review of financial, legal & medical issues with appropriate referrals if needed
- Assistance with move-in to retirement community, assisted living, or skilled nursing facilities
