

Medication Management Program

This service is a part of the supportive/maintenance programs available at Sunset Home Services. This program is designed to ensure that medications are being taken as ordered, while allowing individuals to remain in their own home. It is for senior clients who are able to take their medication if dispensed into a weekly medication set-up box, and is not specific to any condition, illness, or injury. An RN makes the initial visit to evaluate the appropriateness of the medication management service. Ongoing visits are provided by an LPN while an RN remains on as case manager for supervision and coordination of care.

Services

- Assessment & evaluation of medication management issues
- Evaluation of response to medications

Medicine: Use Them Safely
Medication Compliance
Drug Safety

Reimbursement

This program as a standalone is reimbursed by some insurances, but is not covered by traditional payers such as Medicare, Medicaid, and Blue Cross Blue Shield of MI. Weekly visits are conducted on a private pay basis at \$36.50 to \$45.50 per hour. This includes the visit time, documentation and coordination of care time, as well as travel time if applicable. Please call our office for more details.
